OVER 40 YEARS DEVOTED TO GROWING HARDY TREES, PLANTS, SHRUBS, EVERGREENS AND ROSES IN THIS LOCATION UNDER THE SAME MANAGEMENT

Where We Are We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Arkansas.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

With every order amounting to over \$10.00 — we will send a beautiful flowering shrub. (Our choice of variety.)

We have only a limited supply of many of the varieties of nursery stock listed in this circular. We advise that you order **TODAY** so that you will be able to get the exact varieties that you want.

THOUSANDS OF SATISFIED CUSTOMERS FROM EVERYWHERE HERE'S WHY YOU SHOULD BUY FROM US...

High Quality Stock

We guarantee our stock to be as good as the highest priced nurseries in the world. We grow only the best varieties and use only the best methods in growing our stock.

We Sell Direct, No Salesmen

Save from 75 to 100% in buying direct from the growers. Salesmen are compelled to try to make you believe they have better stock because they have to charge you more for their commission. Buy at our low prices where no salesman's commission is added in the cost of the stock.

We Grow Our Own Stock

Over 35 years devoted to growing hardy Ozark Mountain Grown Nursery Stock. It is grown on the tip top of the Ozark Mountains where the soil and climate conditions are ideal for producing the most vigorous, hardiest, and best rooted trees and plants that can be grown.

Our Stock is Adapted to All Climates

We ship to every state in the Union and many foreign countries. We have cool summer nights and short growing season making our stock well adapted to the extreme Northern, Eastern and Western states as well as being the best for Southern states.

Money Back Guarantee

We guarantee you to be satisfied with our stock. Upon receipt of your order, inspect our plants and if you are not satisfied, return them to us and we will refund the amount paid, plus the transportation charges paid by you.

Low Prices

Why can we sell such high quality stock at such amazing low prices? Because we use extra economy in growing, selling, and shipping nursery stock. We have no salesmen to pay commissions. All this savings is passed on to you in these amazing low prices.

State Inspected

Our trees and plants are inspected by the Arkansas State Plant Board and again by experienced nurserymen before shipping. We guarantee you receive no diseased stock from us. Every plant inspected to protect you from any inferior stock.

Experienced Packing

We use the best material available for packing our orders thereby insuring you that all stock arrives in first class condition and will grow. We've had years of experience in shipping nursery stock.

THIS FALL IS THE BEST TIME TO PLANT THAT ORCHARD

—WHY DO EXPERIMENT STATIONS, AGRICULTURAL COLLEGES AND FRUIT GROWERS RECOMMEND FALL BUYING? Because you can buy this Fall and have the stock shipped to you and "heel it in" so that you may plant at the most favorable time, during Fall, Winter, or next Spring.

Fall Planting is becoming more popular each season as experience shows its advantage. As soon as a tree or shrub becomes dormant it can be removed and change of location will affect it but little. When set out in the Fall the bruised roots begin at once to heal and callus is formed; recover quickly from moving;

soon become firmly established and with the first touch of Spring are ready to go into business for themselves in a vigorous way.

Again, the ground is usually in better condition for planting in the Fall than in Spring, for much Spring planting is done when the ground is too wet for best results. Perhaps your Spring will be two or three weeks earlier. In this case your trees should be planted earlier than the dates you have ordered them shipped. If they have been planted in the Fall, these Spring delays are done away with.

Kill Peach Tree Borers This Fall, For Good Fruit Next Spring

HOW TO KILL PEACH BORERS: Use pure Parachlorobenzene on trees when temperature averages 60 degrees F. Remove with hot sticks, sticks, etc. from trunk of tree for a space of 6 to 12 inches. Remove any thick masses of gum on the trunk of tree. Place from 3/4 to 1 1/2-ounces of Parachlorobenzene in a narrow band 2 inches from trunk of tree. Do not place the crystals around the trunk for serious injury might result. Then place 4 to 6 shovels full of dirt over crystals, mounding up toward the trunk. ORIENTAL ORCHIDS OF THE GARDEN
(IRIS KAEMPFER)
Your garden is not complete until you have this beautiful flower growing in your perennial collection. Now you can grow variety Orchids by planting Iris Kaempfer which is entirely different from all other Iris and comes into bloom as the early summer fades, continuing to bloom until mid-fall. The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempfer is called the "Orchid of the Garden." Excellent for cutting it will grow 3 to 4 feet high. Plants thrive in well drained fertile soil (it is fatal to select a location where water stands during winter).

BENCO'S NEW GOLDEN QUEEN RASPBERRY

A real novelty! A new sensational yellow Raspberry of the black Raspberry type. It is a chance seedling that is a cross between the red Raspberry and the black Raspberry. It is both a novelty shrub and a great fruit producer — the berry being of a rich golden color of medium size. Its flavor is entirely different from any berry grown — a blend between the red and black Raspberry. In many cases it is grown in preference to the red and black Raspberries, because of its sugar-sweet flavor. Just before the berry fully matures it is a rich yellow color, and when fully ripe reaches a rich golden yellow. It is truly a novelty shrub for your garden — the most unusual feature of this new variety is that after the first frost the canes will turn a rich yellow color, which is very outstanding during the winter months. The fruit can be eaten fresh or can also be successfully preserved; again they are very outstanding in a glass fruit jar, for the berries retain their rich golden color. Get some for your garden now!

Important Notice!! A new disease of strawberry plants (Red Stele Root Rot) is very destructive and reports of damage vary from 40 to 92 per cent reduction in fruit crop. No treatment of the disease is known and the fungus will live in the soil for several years making it unprofitable to produce strawberries on the same land where the fungus has been in the soil. This disease is spreading rapidly. DON'T TAKE ANY CHANCE OF GETTING INFESTED PLANTS. ORDER FROM US. Our plants are twice inspected, once in the Spring for Red Stele disease and once in the Fall for all kinds of insects and diseases that attack strawberry plants. Our plants are found to be apparently free of all diseases. ORDER OUR PLANTS FOR HEALTHY STURDY PLANTS. DON'T GAMBLE ON CHEAP PLANTS AND LOSE YOUR FRUIT CROP.

NEW BLUE BERRIES

GROW YOUR OWN BLUEBERRIES—PICK THEM FRESH OFF THE BUSH

Cultivated Blueberries are nifty shrubs of rare beauty; they are doubly valuable because they are fruited and ornamental all year.

As a commercial proposition it is one of the most profitable fruits to grow. There is a big market. They make good money in a very short time, for you can begin picking the second or third season after planting.

Choose piece of ground easily supplied with moisture during dry summer months; it should not, however, at any time become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Give only shallow cultivation, not over 2 to 3 inches deep, so as to leave the roots undisturbed.

CONCORD. Bush of upright habit at maturity exceeding 6 feet in height. The berries are large.

JERSEY. Very large and vigorous in habit. The light blue berries are very large.

EVERBEARING CYNTHIANA

An Ideal Arbor Grape

2 YEAR VINES

Each.....79c

Dozen for.....\$7.88

This new Everbearing grape begins to ripen about the time the Concord does, and continues until frost. Has ripe grapes, green ones and blooms on it all the time after they begin to get ripe until the growing season is ended by frost. The best red wine grape known. We say the best because red wine made from this variety, grown at Hurlburg, Mo., about 25 miles south of St. Louis on the Mississippi River won first prize at the World's Exposition at Vienna, Austria, as the best red wine from all nations. (This grape originated right here in Benton County, Arkansas). A very vigorous grower; for making grape where it is without equal. For high dry countries, it appears to be at home as well as on the creek and river bottoms. It does not require a rich soil, but prefers a dry soil of moderate fertility. It is so sweet it is almost too rich to eat out of hand. It has a higher content of sugar than any grape known. The berries are about the size of the Delaware, while the clusters are large; color is black covered with blue bloom.

For edging, as specimen, for urns, window boxes, it is very useful. The foliage is always a shining dark green even through the winter.
